PROJECTS

- **FFP (Food For Poornima)**
  - FFP is a state-of-the-art food delivery web application built using Node.js, Express.js, MongoDB, and Tailwind CSS.
  - The comprehensive admin interface of FFP allows administrators to effortlessly manage menu items, modify order statuses.

- **E-Commerce (.NET & Angular)**
  - The ecommerce project is developed using .NET WebAPI, Angular, Identity, JWT, and MSSQL, featuring separate user and admin interfaces.
  - The admin side of the project enables convenient item management, including editing existing item details and adding new items, ensuring efficient product administration.

ABOUT ME

As a skilled web developer with experience in Frontend and Backend technologies and a passion for organizing events, I am excited to contribute my problem-solving skills and expertise to your organization. With a track record of delivering successful outcomes through effective teamwork and communication, I am confident in my ability to make a valuable impact on your team.

EDUCATION

Bachelor of Technology in Computer Science

Poornima University, Jaipur

08/2019 - 05/2023,

A.V.M.D Institute, Agra

Higher Secondary School, CBSE Board
08/2017 - 03/2019

EXPERIENCE

Software Developer
CodeTrade
01/2023 - Present

- Through my work designing a fully-fledged online exam portal using ASP.NET Core and MSSQL, I was able to increase the efficiency of the exam process.
- My design of an online exam portal using ASP.NET Core and MSSQL led to a 30% reduction in grading time and a 50% increase in exams administered daily.

Web Development & Designing Intern
Sparks Foundation
04/2022 - 05/2022

- As the lead developer of Hostel Booking project, I was able to significantly improve the payment process and user experience for students booking hostel rooms, I worked on both the frontend and backend using NodeJS, JavaScript, Bootstrap, RazorPay, etc.
- We were able to increase the number of successful transactions by 25% and resulting 30% increase in bookings.

Web Development Intern
Suven Consultants & Technology Pvt. Ltd
05/2022 - 06/2022

- I contributed to a social media web application developed with PHP and MySQL, optimizing its database queries and implementing caching techniques.
- This resulted in a 40% reduction in page load time and a 20% increase in user engagement.
